

Name _____

Behind the Seams: Exploring the Garment Industry

Short Answer Key

1. Quality control ensures that garments are free from defects and meet high-quality standards before they reach the market.
2. Two types of materials are natural materials like cotton and synthetic materials like polyester.
3. Distribution centers package and ship clothing to retail stores or customers, ensuring it reaches its intended destination.
4. Fashion trends dictate what clothing styles and designs are popular at a given time, influencing what clothing brands produce and consumers choose to wear.
5. The final step is when consumers make choices about the clothes they want to buy based on their preferences and needs.
