

Name _____

The Daily Habits and Behaviors of Giraffes

Open-Ended Response Answer Key

1. Giraffes live in groups because it helps them stay safe from predators and allows for social bonding.
2. In a zoo, a giraffe might have a smaller space, less natural food, and fewer dangers from predators.
3. A giraffe's day involves grazing on leaves, socializing with its group, staying alert for predators, and resting for short periods.
4. Protecting giraffes is important because they keep their ecosystem healthy and balanced by controlling vegetation growth.
