

Name _____

The Life Cycle of a Giraffe

Open-Ended Response Answer Key

1. Baby giraffes can stand and walk soon after birth to avoid predators and stay safe in the wild.
2. A giraffe's height helps it reach food in tall trees and spot predators from far away.
3. Giraffes face challenges such as predators, habitat loss, and food scarcity as they grow older.
4. Protecting giraffes and their habitats is important to maintain a balanced ecosystem and preserve biodiversity.
