

Name _____

Frozen Giants: How Glaciers Shape the Earth's Landscape

Short Answer

1. Describe how fjords are formed and what makes them unique.
2. Explain the significance of moraines as records of glacial movements.
3. How do glaciers contribute to the erosion and shaping of landscapes?
4. What is post-glacial rebound, and how does it affect landforms?
5. Discuss the environmental impact of glacier retreat due to climate change.
