

Name _____

Goldfish: Where Do They Live?

Short Answer Key

1. Goldfish prefer calm, shallow water in ponds, lakes, or streams.
2. Goldfish were originally found in East Asia, especially in China.
3. In the wild, goldfish eat tiny plants, insects, and small animals like shrimp.
4. Clean water is important because it provides oxygen and keeps goldfish healthy.
5. No, goldfish cannot live in salty water because their bodies are not adapted to it.
