

Name _____

What's on the Menu for Grasshoppers?

Short Answer Key

1. Grasshoppers eat plants like grass, leaves, and crops.
2. Grasshoppers use their mandibles to cut and chew plants.
3. Grasshoppers are herbivores because they eat only plants.
4. Grasshoppers help control plant growth and serve as food for other animals.
5. Grasshoppers can cause problems for farmers by eating their crops in large swarms.
