## Jumping Wonders: All About Grasshoppers

### Open-Ended Response Answer Key

1. Grasshoppers are important because they help control plant growth, provide food for animals, and keep ecosystems balanced.
2. Farmers might feel worried or frustrated because a swarm can destroy their crops quickly, causing them to lose money and food.
3. I would like to learn how grasshoppers find their food, how far they can jump, and how they make their chirping sounds.
4. Grasshoppers' colors help them hide from predators, and their jumping ability lets them escape danger quickly.
