## Green Guardians: Protecting Our Earth

In a world of beauty, nature's masterpiece,  
I stand before you, my plea shall not cease.  
Listen closely, for the Earth has a voice,  
A message of urgency, a powerful choice.  
The trees, they weep, the oceans sigh,  
As we plunder and pollute, they wonder why.  
Our world is in peril, the signs are clear,  
It's time to act, to hold our planet dear.  
Plastic seas, melting ice, and poisoned air,  
A world in crisis, it's more than we can bear.  
But together we stand, a force so grand,  
To heal our Earth, to protect the land.  
Recycle, reduce, reuse, and renew,  
These are the actions we must all pursue.  
Plant trees, save bees, and clean our streams,  
For in these small steps, we can chase our dreams.  
The time has come to make a stand,  
To protect our Earth, our precious land.  
Let's be the heroes, the green guardians we know,  
For it's in our hands, the power to make it so.
