

Name _____

How Do Human Activities Contribute to Climate Change?

Short Answer Key

1. Driving cars, flying planes, or using machines that burn fuel.
2. Trees absorb carbon dioxide from the air.
3. It's when gases trap heat in the atmosphere and warm the Earth.
4. Global warming means Earth's average temperature is rising.
5. Fewer trees mean more CO₂ stays in the air, causing more warming.
