

Name _____

How Do Human Activities Contribute to Climate Change?

Open-Ended Response Answer Key

1. I could walk or bike instead of riding in a car, or turn off lights to save energy.
2. Animals may lose their homes due to melting ice or changing habitats.
3. It helps us understand how to take care of the Earth and make better choices.
4. Earth could get too hot, sea levels could rise, and there might be more natural disasters.
