## Why Are Polar Regions Warming Faster Than Other Parts of the World?

### Open-Ended Response Answer Key

1. It's important because changes there can affect the weather and sea levels all over the world.
2. They might experience rising seas, stronger storms, or changing seasons.
3. People can drive less, use cleaner energy, and protect forests to lower pollution.
4. I would want to study how fast the ice is melting and how animals are being affected.
