## Can Planting Trees Really Help Stop Climate Change?

### Open-Ended Response Answer Key

1. Because forests already hold a lot of carbon, and cutting them down adds more carbon to the air.
2. In the schoolyard, so students can learn about trees and enjoy the shade.
3. We could recycle more, use less electricity, and plant a garden or trees.
4. I would make posters, talk to classmates, and invite families to join.
