

Name _____

The Role Cows, Rice Paddies, and Landfills Play in Global Warming

Open-Ended Response Answer Key

1. Because these things add to global warming and we need to understand how to stop it.
2. It can help reduce pollution and protect the air we breathe.
3. We could save leftovers, compost food scraps, or donate extra food.
4. I would invent a machine to collect methane from trash and turn it into power.
