

Name _____

Could Renewable Energy Replace Fossil Fuels Around the World?

Short Answer Key

1. Fossil fuels are energy sources like coal, oil, and natural gas that come from the Earth.
2. Wind and solar power.
3. They release gases that pollute the air and make the planet warmer.
4. The sun and wind are not always available.
5. By building more solar panels and wind turbines, and using new technology.
