## How Do Human Activities Contribute to Climate Change?

### Multiple Choice Questions

1. What gas is mostly released when people drive cars or burn fuel?
  - A. Carbon dioxide
  - B. Oxygen
  - C. Helium
  - D. Hydrogen
  
2. What do trees do that helps the environment?
  - A. Trap heat
  - B. Make more clouds
  - C. Take in carbon dioxide
  - D. Blow away pollution
  
3. What happens when more greenhouse gases are in the atmosphere?
  - A. The planet gets colder
  - B. Earth loses oxygen
  - C. The Earth traps more heat
  - D. It rains every day
  
4. Cutting down trees leads to:
  - A. More oxygen in the air
  - B. Less carbon dioxide
  - C. Cleaner air
  - D. More greenhouse gases
  
5. Which is one way to help slow down climate change?
  - A. Driving more cars
  - B. Using solar energy
  - C. Cutting down forests
  - D. Leaving lights on all day
