

Name _____

Guppy Life: A Day in the Life of a Tiny Fish

Short Answer Key

1. Being diurnal means guppies are active during the day and rest at night.
2. Guppies live in groups to stay safe from predators and make it easier to find food.
3. Male guppies attract females by showing off their bright colors and performing small “dances.”
4. During the day, guppies spend their time exploring, searching for food, and playing with others.
5. At night, guppies rest near plants or other safe spots.
