

Name _____

The Amazing Reproductive Cycle of Guppies

Short Answer Key

1. Livebearers give birth to live young instead of laying eggs.
2. Male guppies attract females by performing mating dances and showing off their colorful tails.
3. It takes 21 to 30 days for guppy fry to develop inside the mother.
4. Aquarium owners can provide hiding spots, like plants or shelters, to protect guppy fry.
5. Guppies reproduce quickly because they can give birth to many fry at one time and have short gestation periods.
