

Name _____

How Guppies Talk Without Words

Short Answer Key

1. Male guppies use their tails and fins to perform dances and show off their bright colors to attract females.
2. When guppies sense danger, they dart around quickly or hide among plants to stay safe.
3. A pheromone is a chemical signal that guppies release to communicate messages, like warnings or readiness to mate.
4. A male guppy might stop his display to avoid competing with another male for a female's attention.
5. Examples of guppy body language include swimming slowly when curious or darting quickly when sensing danger.
