

Name _____

The Tiny but Fascinating Guppy

Open-Ended Response Answer Key

1. Guppies are popular for aquariums because they are colorful, easy to care for, and fun to watch.
2. Their bright colors may help them attract mates and confuse predators in the wild.
3. Without guppies, mosquito populations might grow, leading to more mosquito-borne diseases.
4. To care for guppies, you would provide clean water, the right temperature, and food like fish flakes or mosquito larvae. You'd also make sure they have space to swim and live safely.
