

Name _____

The Komodo Dragon's Habitat

Open-Ended Response Answer Key

1. The warm, dry habitat helps Komodo dragons stay warm, and their strong bodies help them hunt in open areas.
2. If Komodo dragons lost their habitat, they might not have enough food and could become endangered.
3. They are only found in certain parts of Indonesia because those areas have the right climate and food sources.
4. People can help by preventing habitat destruction and supporting wildlife conservation efforts.
