

Name _____

Penguin Paradise: Exploring the Habitats of These Fascinating Birds

Short Answer Key

1. Penguins can be found in the Galápagos Islands, among other places.
2. Penguins stay warm in cold environments by relying on thick layers of blubber and waterproof feathers.
3. The Galápagos Islands are inhabited by the Galápagos penguin.
4. Penguins' adaptations such as streamlined bodies and excellent swimming skills enable them to survive in their habitats.
5. In warmer climates, penguins may face challenges such as predation and habitat destruction.
