

Name _____

Shark Habitats: Exploring the Oceans' Most Diverse Environments

Short Answer Key

1. Reef sharks and nurse sharks.
2. The open ocean habitat is characterized by vast expanses of water and is home to some of the largest shark species.
3. Deep-sea sharks adapt to their environment by possessing bioluminescent organs to attract prey and highly sensitive electroreceptors to detect electrical signals.
4. Bull sharks and lemon sharks can be found in rivers, estuaries, and mangrove swamps.
5. Sharks play the role of top predators in marine ecosystems.
