

Name _____

All About Meerkat Habitats

Short Answer Key

1. Meerkats choose open areas with few trees so they can spot predators easily.
2. Burrows help meerkats survive extreme weather by keeping them cool during the day and warm at night.
3. Meerkats live in groups for safety and cooperation in finding food.
4. Insects and small mammals are two types of food meerkats eat.
5. Meerkats alert each other of danger by sounding an alarm call.
