

Name _____

The Daily Habits of Leopards

Short Answer Key

1. Leopards are active at night to avoid other predators and hunt better.
2. Being solitary means they live alone and not in groups.
3. Leopards hunt by stalking their prey silently and attacking suddenly.
4. Leopards rest in trees during the day to stay hidden and safe.
5. Leopard mothers teach their cubs to hunt and survive before they leave on their own.
