

Name _____

What Does a Hedgehog Look Like?

Short Answer Key

1. A hedgehog's quills are made of keratin and help protect it from predators.
2. Hedgehogs curl into a ball, hiding their soft parts and exposing their spines.
3. Hedgehogs can be 5 to 12 inches long and weigh 1 to 2 pounds.
4. Hedgehogs eat insects, worms, and fruits.
5. Their pointed snout helps them sniff out food easily.
