## Hedgehogs' Daily Habits and Behaviors

### Short Answer Key

1. Being nocturnal means being active at night and sleeping during the day.
2. Hedgehogs curl into a ball to protect themselves using their spines.
3. Hedgehogs eat insects, worms, small frogs, fruits, and plants.
4. Hedgehogs find food by sniffing and digging through soil and leaves.
5. Hedgehogs live alone because they are solitary animals and avoid other animals unless it is mating season.
