

Name _____

Could Humans Call the Moon Home?

Short Answer

1. Describe the lunar conditions that pose challenges for humans to live on the Moon.
2. Explain some of the potential risks and concerns related to radiation exposure for lunar inhabitants.
3. What role will lunar missions under the Artemis program play in advancing our understanding of lunar living?
4. Imagine you are tasked with designing a lunar habitat. Outline some key features and technologies that would be necessary for human survival.
5. How might living on the Moon impact the psychological well-being of lunar inhabitants, and what measures could be taken to address this challenge?
