

Name _____

Where Do Houseflies Call Home?

Short Answer Key

1. Houseflies need food, warmth, and shelter in their habitat.
2. You might find houseflies near garbage, barns, or outdoor picnics.
3. Houseflies avoid forests and oceans because food is scarce, and they don't provide a suitable habitat.
4. Houseflies adapt to cooler climates by living inside homes or other structures for warmth and food.
5. Houseflies help break down waste, which is an important part of nature's cleanup process.
