

Name _____

A Day in the Life of a Housefly

Open-Ended Response Answer Key

1. Houseflies gather in areas with food or warmth because these places make it easier for them to survive.
2. Being diurnal helps houseflies avoid predators and find food during daylight hours.
3. Observing houseflies could involve watching how they eat, groom, or interact, which reveals how they survive and communicate.
4. If houseflies stopped cleaning themselves, they might struggle to sense their surroundings and locate food.
