## What Hunts the Housefly?

### Short Answer Key

1. Frogs and lizards are two animals that hunt houseflies.
2. Cold temperatures, strong winds, and rain are dangerous for houseflies.
3. Houseflies use their large eyes to see in almost all directions and detect threats.
4. Fly swatters and bug sprays are two tools humans use to harm houseflies.
5. Reproducing quickly ensures that the species survives even if many flies are lost.
