Name _____

How Can You Tell If a Chemical Reaction Has Occurred?

Short Answer

1. Give an example of a chemical reaction that results in a change of color.

2. Describe a scenario where a chemical reaction produces a noticeable change in temperature.

3. Explain why the smell of freshly baked goods is an indicator of chemical reactions.

4. Provide an example of a chemical reaction that forms a precipitate.

5. How does chemiluminescence play a role in everyday life?
