

Name _____

How Intelligent is a Monkey?

Open-Ended Response Answer Key

1. Using tools shows intelligence because it demonstrates problem-solving, creativity, and the ability to adapt to challenges.
2. Living in groups helps monkeys share food, protect each other from predators, and build strong social bonds for survival.
3. Scientists test monkey intelligence by giving them puzzles, tasks, or mazes to solve, often requiring tools or memory skills.
4. Learning by watching others helps monkeys quickly adapt to new challenges and survive by copying successful behaviors.
