

Name _____

Surfing the Web: Unveiling the World of Internet Service Providers (ISPs)

Short Answer

1. How do broadband ISPs differ from wireless ISPs (WISPs) in terms of the technology they use to provide internet access?
2. Explain the process of connecting to the internet through an ISP, including the role of a modem or router.
3. What is the significance of data plans offered by ISPs, and how do they cater to different user needs?
4. Describe one way in which ISPs contribute to online security and privacy for their customers.
5. Discuss the potential benefits of 5G networks in the future of ISPs and internet access.
