## The Daily Habits of Iguanas

### Short Answer Key

1. Iguanas need sunlight to stay warm since they are cold-blooded.
2. Iguanas eat plants such as leaves, flowers, and fruits.
3. Iguanas climb trees using their strong claws and tails for balance.
4. Being solitary means preferring to live alone rather than in groups.
5. Male iguanas bob their heads and whip their tails to scare off rivals.
