

Name _____

Zooming into Electric Vehicle Incentives

Open-Ended Response Answer Key

1. Possible Answer: Government incentives promote the adoption of electric vehicles, which reduces greenhouse gas emissions and helps combat climate change, aligning with environmental goals.
2. Possible Answer: Access to HOV lanes can reduce commuting time and congestion, making electric vehicles more appealing and promoting their use.
3. Possible Answer: They could check with local or national authorities, visit government websites, or contact electric vehicle dealerships for the most up-to-date information on incentives.
4. Possible Answers: Electric vehicles reduce air pollution, decrease noise pollution, and help combat climate change by reducing greenhouse gas emissions.
