

Name _____

What Does a Jellyfish Look Like?

Open-Ended Response Answer Key

1. Jellyfish are special because they can glow, have no bones, and use tentacles to catch food.
2. Jellyfish have survived because they can live in many parts of the ocean and catch food easily with their stingers.
3. Jellyfish help control plankton levels and provide food for sea turtles.
4. I would feel amazed and curious because glowing jellyfish look magical and rare.
