

Name _____

The Mysterious World of Jellyfish

Open-Ended Response Answer Key

1. Jellyfish are unique because they have no bones, are mostly water, and can glow in the dark.
2. Jellyfish have survived for so long because they can live in many parts of the ocean and have stingers to catch food.
3. Jellyfish help control plankton populations and provide food for sea turtles.
4. I would stay away from the jellyfish to avoid being stung and alert a lifeguard if needed.
