

Name _____

Where Kangaroos Live

Short Answer Key

1. Kangaroos need open spaces to hop easily and escape predators.
2. Grasslands have tall grasses with few trees, while woodlands have scattered trees with more shade.
3. Strong legs help them hop far, and their tails help balance.
4. Red kangaroos live in central Australia, and eastern grey kangaroos live along the eastern coast.
5. They keep grasslands healthy by preventing overgrowth and spreading seeds.
