

Name _____

Where Kangaroos Live

Open-Ended Response Answer Key

1. The habitat provides food, space, and safety, which affects how kangaroos move and graze.
2. Australia has the ideal climate and vegetation for kangaroos, while other continents do not.
3. It would have open spaces, grass for food, and scattered trees for shade.
4. Strong legs for hopping, good eyesight for spotting danger, and a tail for balance all help protect kangaroos.
