

Name _____

The Life Cycle of a Kangaroo

Short Answer Key

1. A kangaroo joey is born very small, blind, and hairless.
2. The pouch keeps the joey safe and helps it continue to grow.
3. The joey starts peeking out of the pouch and hopping around.
4. Kangaroos eat grass and leaves when they become independent.
5. Kangaroos can live up to 20 years in the wild.
