

Name _____

Do Kangaroos Form Relationships with Other Species?

Short Answer Key

1. Commensalism is when one species benefits and the other is unaffected.
2. Ticks and mites feed on the blood of kangaroos, harming them.
3. Kangaroos graze on grass, preventing overgrowth and keeping the ecosystem balanced.
4. Kangaroos do not receive direct benefits from plants, making it not mutualism.
5. Ticks and mites harm kangaroos by feeding on their blood.
