

Name _____

Do Kangaroos Form Relationships with Other Species?

Open-Ended Response Answer Key

1. Kangaroos keep grasslands healthy, which helps many plants and animals thrive.
2. In some cases, both species can benefit, such as when birds get food and alert the host to danger.
3. (Example) I might feel annoyed but also glad to help other animals in the ecosystem.
4. Kangaroos can survive well on their own by grazing and using their speed for protection.
