

Name _____

What Does a Koi Look Like?

Short Answer Key

1. A koi fish's body is long and torpedo-shaped, which helps them swim smoothly.
2. Most koi fish weigh around 10 to 15 pounds.
3. Koi fish's barbels are small, whisker-like features near their mouths that help them feel around for food.
4. Koi fish need a lot of space because they can grow very large, up to 2 or 3 feet long.
5. Koi fish's large, fan-like fins help them glide gracefully through the water.
