

Name _____

Where Do Koi Fish Live?

Short Answer Key

1. Koi fish live in outdoor ponds, gardens, and water features. Their homes are designed with clean water, plants like water lilies, and enough space for the fish to swim.
2. Koi fish prefer water temperatures between 65 and 75 degrees Fahrenheit.
3. Koi fish need clean water to stay healthy and avoid getting sick.
4. Koi fish originally came from East Asia, where they were bred from common carp.
5. People enjoy koi ponds because they are peaceful, beautiful, and relaxing to watch.
