## Ladybugs: A Closer Look at Their Appearance

### Open-Ended Response Answer Key

1. Ladybugs' bright colors warn predators that they might taste bad or be poisonous, keeping them safe.
2. (Example response) My favorite feature is their spots because they make each ladybug look unique.
3. (Example response) My new ladybug would be rainbow-colored with glittery wings and glow in the dark!
4. Hiding their wings under a hard shell keeps them safe from damage and allows the ladybug to fly when needed.
