

Name _____

Where Do Ladybugs Live?

Short Answer Key

1. Ladybugs need plants because that's where aphids, their main food source, live.
2. Ladybugs prefer warm and sunny weather.
3. Ladybugs might hibernate under tree bark or inside logs.
4. Deserts are too dry, and ladybugs need water from their environment.
5. Ladybugs help by eating aphids and other pests that harm plants.
