

Name _____

Where Do Ladybugs Live?

Open-Ended Response Answer Key

1. Without ladybugs, aphid populations might grow too large, damaging many plants and crops.
2. Ladybugs gather in groups during winter to stay warm and protect themselves from predators.
3. (Example response) I would choose a sunny garden because it has lots of plants and aphids for food.
4. A ladybug's environment provides the food, shelter, and warmth it needs to survive and reproduce.
