

Name _____

Ladybugs: How They Communicate

Short Answer Key

1. Ladybugs release a yellow, smelly liquid from their legs.
2. Their bright colors warn predators that they might be poisonous or taste bad.
3. Ladybugs raise their outer shell to signal they are about to fly.
4. Ladybugs use touch to recognize and interact with each other.
5. Ladybugs don't need sounds because they use scents, colors, and movements to communicate.
