

Name _____

What Threatens a Ladybug?

Short Answer Key

1. Birds and frogs are two animals that prey on ladybugs.
2. Ladybugs use their bright colors to warn predators that they might taste bad or be poisonous.
3. Extreme weather, like heavy rain or drought, can harm ladybugs.
4. Pesticides can kill ladybugs or destroy their food sources.
5. Parasites can weaken ladybugs, making it harder for them to survive.
