

Name _____

Ladybugs: Tiny Heroes of the Ecosystem

Short Answer Key

1. Ladybugs help farmers and gardeners by eating pests like aphids that harm plants.
2. Aphids suck the juice from plants, which can damage or kill them.
3. Birds and frogs eat ladybugs.
4. Ladybugs help pollinate plants when they crawl on flowers while searching for food.
5. Ladybugs control pests, support the food chain, and help keep plants healthy.
